INDEX TO VOLUME 13

Author Index

ABED, M.H. *Paper on* 'An attempt to identify quality-related costs in textile manufacturing', 41

BARKER, T.B. *Paper on* 'Quality engineering by design: Taguchi's philosophy', 72

CARPENTER, G. *Paper on* 'Significant improvement to the quality of Duracell speciality battery products manufactured by Gatwick Road Assembly Division', 101
CASBOURNE, B.R. *Paper on* 'The quality improvement process within Plessey Telecommunications Systems Ltd', 108

DALE, B.G. *Paper on* 'Some problems in applying statistical process control', 14. *Paper on* 'An attempt to identify quality-related costs in textile manufacturing', 41
DUDDING, B.P. *Paper on* 'Errors in testing bulk supply by random selection', 51

FISHER, B.V. *Paper on* 'The replacement of the use of animals for the quality control of insulin by high performance liquid chromatography', 00

GOH, A.B. *Paper on* 'Statistical techniques applied to a manufacturing process problem', 91
GOH, T.N. *Paper on* 'A control chart for very high yield processes', 18
GUNTER, B. *Paper on* 'A perspective on the Taguchi Methods', 81
GUTHRIE, G. *Paper on* ' "After Japan" and beyond: a study of the experience of quality circles in Ford Motor Company', 37

HALL, D.G. *Paper on* 'Integrated inspection and assembly', 23

JOHNS, A. *Paper on* 'Application of computer techniques to the inspection of turbine blades', 28
JORDAN, P.E. *Paper on* 'Quality improvement in a machine tool company', 117

KACKAR, R.N. *Paper on* 'Taguchi's quality philosophy: analysis and commentary', 65
KILSHAW, J.A. *Paper on* 'Significant improvement to the quality of Duracell speciality battery products manufactured by Gatwick Road Assembly Division', 101

MARTIN, D.P.A. *Paper on* 'Integrated inspection and assembly', 23

OGILVIE, J. *Paper on* 'Quality improvement at work', 112

PARMENTER, G. *Paper on* 'Significant improvement to the quality of Duracell speciality battery products manufactured by Gatwick Road Assembly Division', 101
PRESTON, G. *Paper on* 'Management aspects of statistical process control implementation', 5

RIGGS, J.L. *Paper on* 'An algorithm for solution of hypergeometric probabilities', 34

SHAW, P. *Paper on* 'Some problems in applying statistical process control', 14
SULLIVAN, L.P. *Paper on* 'The power of Taguchi Methods', 88

TAYLOR, G.A.R. *Paper on* '2 × 2 contingency tables as a diagnostic aid', 57
THOMAS, M.A. *Paper on* 'The implementation and benefits of statistical process control', 10
TOWE, N.J. *Paper on* 'Quality or productivity?', 46

Subject Index

AQAP-1 118
AQAP-4 101
Air conditioning, in textile manufacture 43
Airfoils, inspection of 30
Allowance design. *See under* Tolerance design
Aluminium die-casted parts. *See under* Statistical techniques applied to a manufacturing process problem
Analysis of variance (ANOVA) 76, 86
Animals, replacement of, in insulin assay. *See under* Insulin assay
Attributes, control charts for 12, 16
Audits 120
  to maintain quality standards 47
Automation 22, 103, 107, 120
  See also Integrated inspection and assembly
Automobile industry 5, 17, 83, 88, 90
  See also Quality circles

Binomial probability paper 60
British Pharmacopoeia 97, 99
British Quality Association awards 108, 109, 118, 122
British Standard
  5750 11, 46, 47, 108
  6001 104
  6002 104
  6143 109
  See also Quality-related costs
British Standards Institution *(BSI 397: Part 1)* 103
Bulk supply. *See under* Errors in testing bulk supply
Butterfly, improved manufacture of 75

Capability of machine or process 6, 7, 12, 73, 92
Case studies, Taguchi Methods 86, 88
Centralised cell test, the 105
Clamping and fixturing 93
Colour matching 43
Communication 8, 11, 38, 103, 120
Company culture. *See under* Traditional organisation structures
Competitiveness 65, 73, 88, 108, 112, 117
Computer-based systems, for speciality cell manufacture 103
Computer equipment, improved quality of
  management commitment to 112
  manufacturing processes for 114
  people's attitudes to 113
  performance indicators for 116
  training programme for 114
Computer software
  for Fisher's exact procedure 59
  for reject registers 25
  quality costs for 50
Computers
  for control charts 22
  for production data 26
  for SPC 7
  See also Inspection of turbine blades
Contingency tables. *See under* 2 × 2 contingency tables
Control chart, for very high yield processes
  chart for cumulative counts of conforming items 20
  control of p and effect of low p 18
  statistical properties of cumulative counts 19
Control charts, for SPC 12, 15
Corrective action teams 109
Cost savings
  and integrated inspection and assembly 23
  and quality circles 37, 38, 114
  and SPC 10, 15
  and statistical techniques 94
  in insulin assay 99
  in speciality cell production 107
  See also Quality-related costs
    Taguchi Methods
Costs, in-plant, reduction of 115
Costs, quality 48, 105, 109, 110, 118
Customer's loss 66, 82

Data
  and computer techniques 28
  and SPC 5, 12
  for purchased parts quality control 104
  for quality costing 42
  misuse of 15, 44
  on cost of design errors 48
DEF Standard 05-21 46, 101
Defects
  cost of 42, 119
  defect-free performance 115
  defect-free process yield 114
  error analysis 47
  processing of rejects, automated 25
  reduction of, in speciality cell production 102, 105
  warranty costs 120
  See also Error
    Quality or productivity?
    2 × 2 contingency tables
    Zero defects
Deming, W.E. 11, 12, 15, 82, 90
Design
  and assembly of batteries 103, 106
  and manufacture (TM) 67
  of part, to reduce defects 93, 94
  parameter 68, 74, 84, 89
  quality by 83
  robust 84
  system 68, 74, 83
  tolerance 69, 74, 84
Design errors. *See under* Quality or productivity?

Engineering target values 66, 89
Error, 'human' 7, 32
  See also Quality or productivity?
Errors in testing bulk supply by random selection
  comparison of distribution of observed and computed errors 52
  effect of number of samples on results 53
  the Gaussian law 51

Failure. *See under* Defects
    Errors
Financial control system 89
Fisher's exact test 59
Ford Motor Company 83, 88, 90
  See also Quality circles
Forum, to correct design error 49
Funding 65, 89, 108, 120

Gaussian law, the 51
Glass tube, estimation of quality of 53

High performance liquid chromatography. *See under* Insulin assay
High volume competitive environment 112
High yield processes. *See under* Control chart, for very high yield processes
Horizontal technical interaction 89
Hypergeometric probabilities, an algorithm for solution of 34

Industrial standards 90

Inspection
counter-productive 46
frequency of 16
100 per cent 8, 23
of aluminium die-casted parts 92
of cells 103
of goods received 104, 120
replaced by best-value analysis 89
replaced by control/audit function 120
Inspection of turbine blades, application of computer techniques to
inspection of airfoils 30
multi-point gauging 28
proof inspection 32
Insulin assay, replacement of the use of animals by high performance liquid chromatography in 97
Integrated inspection and assembly
an ideal machine for 24
development of 23
Investment. *See under* Funding

Japan 5, 46, 50, 108, 117
